FOR ALL YOUR CONSULTATION NEEDS

A mortgage is a sum of money borrowed from a bank or building society in order to purchase a property. The money is then paid back to the Lender over a fixed period of time together with accrued interest.

There are many different types of mortgages and there will be one out there that best suits your requirements. If you're going to make the most of your mortgage, you need to minimise the amount of interest that you pay.

You can find a mortgage product to suit your own individual requirements. Whether you are a First Time Buyer, Home Owner or wish to Remortgage, we will endeavour to recommend a product to suit your needs.

A mortgage is potentially the largest financial commitment of your life and therefore, every enquiry is treated with the respect that it deserves.

Repayment Methods

Repayment - A Repayment Mortgage is structured so that the monthly mortgage payments, comprising partly of capital and partly of interest, pay off the original amount borrowed as well as the interest that would be accrued over the mortgage term.

Interest only - So called due to the fact that you only pay interest to the lender each month. The original loan amount remains the same for the term of the loan.

Therefore a suitable investment is required to run in conjunction with the mortgage in order to repay the loan balance at the end of the term.

The most common investments used for this purpose include Pensions, Encouragement and ISA's.

We can help you find the most suitable type of mortgage which includes:

- Fixed Rate Mortgages
- Capital Protection Mortgages
- Discounted Rate Mortgages
- Variable Mortgages
- Other Mortgages
- Tracker Mortgages

Your home may be repossessed if you do not keep up repayments on your mortgage.

Protection

We can never be sure what's waiting for us around the next corner. It could be a great new job, a new baby or even a win on the lottery. But sometimes without warning, life throws the unthinkable at us.
